

# Daniel Rodriguez - Senior Full Stack Mobile Specialist & Cloud Engineer

Aubrey, TX | (469) 443-8703 | danymar24@gmail.com | <https://danielr.dev/> | [linkedin.com/in/danielrdzm/](https://www.linkedin.com/in/danielrdzm/) | [github.com/danymar24](https://github.com/danymar24)

## Summary

High-autonomy Senior Full Stack Mobile Engineer and Architect with over 14 years of experience building, scaling, and shipping production mobile applications (iOS & Android) backed by resilient cloud APIs. Specialist in zero-to-one React Native development, Node.js/GraphQL backend engineering, and automated CI/CD release pipelines. Proven track record of independently owning complete technical deliverables—from greenfield mobile architecture and App Store deployment to legacy cloud migrations and production GenAI/RAG integrations.

## Core Technical Competencies

- **Mobile Engineering:** React Native, TypeScript, iOS (Swift), Android (Kotlin), Storybook, Detox, Jest, Capacitor, Ionic.
- **Backend & APIs:** Node.js, GraphQL (Apollo Server/Client), RESTful Microservices, NestJS, Next.js Express, MongoDB.
- **Cloud & DevOps:** GitHub Actions CI/CD, Microsoft Azure, AWS, Docker, Fastlane / Appflow, Automated Releases.
- **Architecture & Modernization:** Microsoft Entra ID (OAuth/OIDC/SSO), Cloud Migration, LLM Data Pipelines, RAG Workflows (Copilot Studio).

## Technical Experience

### Children's Health Systems of Texas — Aubrey, TX

*Senior Full Stack Mobile Architect & Specialist* | January 2023 – Present

*Tech Stack: React Native, TypeScript, Node.js, GraphQL, Azure, AWS, GitHub Actions, LLMs / GenAI, RAG, iOS, Android, Swift, Kotlin, Copilot Studio*

- Architected, built, and shipped the organization's flagship React Native cross-platform application from zero-to-one, owning core client architecture, component systems, and production App Store / Google Play deployments.
- Engineered high-throughput GraphQL APIs and Node.js microservices to streamline client-server data fetching and eliminate network payload bottlenecks.
- Built automated GitHub Actions CI/CD deployment pipelines for critical mobile software, cutting release cycles from 15 days to 5 days while enabling rapid hotfix delivery.
- Re-engineered and migrated legacy on-premise clinical applications (Formcalc) into Azure App Services, establishing high availability, zero-maintenance stability, and cloud scalability.
- Modernized platform authentication by integrating Microsoft Entra ID and OAuth 2.0, completely eliminating recurring weekly login failures and session drops.
- Designed and deployed data orchestration pipelines for the CMAP platform using LLMs and Copilot Studio RAG workflows to ingest and summarize unstructured clinical data.
- Resolved emergency vendor auth deprecations with zero disruption to active mobile end users by re-platforming authentication services end-to-end.

## **Lessen Inc. — Aubrey, TX**

*Senior Full Stack Mobile Engineer* | April 2022 – December 2022

*Tech Stack: React Native, TypeScript, Node.js, NestJS, MongoDB, GraphQL, AWS, Redux, GitHub Actions, Jest, Detox, iOS, Android, Java, Swift, Kotlin*

- Built and deployed cross-platform React Native mobile applications end-to-end across iOS and Android from initial design through production release.
- Engineered backend microservices and REST/GraphQL APIs using Node.js, NestJS, and MongoDB hosted on AWS infrastructure.
- Built automated unit and end-to-end testing suites using Jest and Detox, integrating them into GitHub Actions CI/CD pipelines for regression-free releases.
- Architected modular client-side state management and reusable component libraries using Redux and Storybook.

## **Norwex — Coppel, TX**

*Senior Mobile & Frontend Engineer* | January 2021 – April 2022

*Tech Stack: Ionic, Capacitor, Angular, TypeScript, NgRx, RxJS, Firebase, AWS, GitLab CI/CD, Ionic Appflow, Cypress, iOS, Android*

- Developed and deployed multi-region mobile apps using Ionic, Capacitor, and Angular, delivering localized internationalization (i18n) and multi-currency support.
- Engineered reactive client architectures and state management workflows using NgRx and RxJS for high-performance mobile transactions.
- Automated staging builds and App Store distribution pipelines using GitLab CI/CD and Ionic Appflow.
- Built end-to-end automated UI tests using Cypress to validate cross-platform stability across iOS and Android OS updates.

## **Toyota Motors North America — Plano, TX**

*Senior Full Stack & Mobile Engineer* | April 2018 – January 2021

*Tech Stack: React Native, Ionic, Angular, TypeScript, GraphQL, Node.js, Docker, Azure, REST APIs*

- Migrated legacy web applications into high-performance cross-platform mobile apps utilizing React Native and Ionic.
- Re-architected legacy REST endpoints into a unified GraphQL layer using Apollo Server and Client, reducing payload sizes and mobile network requests.
- Built containerized backend microservices using Docker and Azure to power telematics support platforms.

## **Additional Engineering Experience**

- **Thomson Reuters** | *Senior Frontend & API Developer* (AngularJS, Node.js, REST APIs) | 2017 – 2018
- **AT&T** | *Senior Frontend Developer* (AngularJS, JavaScript, Responsive UI) | 2016 – 2017
- **Buildbinder / Xpectare / Freelance** | *Mobile & Full Stack Developer* (Cross-Platform Mobile, Web APIs) | 2011 – 2016

## Education & Credentials

- **Bachelor of Science in Electronics Engineering** — Chihuahua Institute of Technology  
(*Instituto Tecnológico de Chihuahua*)
- **Languages:** English (Fluent/Professional), Spanish (Native)
- **Citizenship:** U.S. Citizen
